Connect Your Mac to 4K Ultra HDTV

Supporting the new Ultra HD up to 4K resolution, this premium Mini DisplayPort to HDMI® Cable lets you view your favorite movies in full HD with multi-channel digital audio output. The cable is fully compatible with Thunderbolt 2 or DisplayPort 1.2 devices so you can easily connect your Mac to any TV or display to create the ultimate multimedia experience right from your home.

Single Cable Solution

One cable for both audio and video means fewer cables to connect to your device. High flexibility, low bend radius and compact connectors will fit neatly under tight spaces.

Convenient Length

At 6.6 ft. in length, our HDMI cable provides you with the flexibility to extend your desktop content from anywhere in the classroom, office or at home.

Works with MacBook, iMac and Mac mini

Whether you're using an existing Mac with Mini DisplayPort or looking to upgrade to the latest MacBook Pro, we've got you covered. Our Mini DisplayPort to HDMI Cable transmits video and audio from your Mac equipped with Mini DisplayPort to an HDTV.
